NOTE 1: \* Available colors for Designer Series lavatory sinks (Manhattan™, Nantucket™, Laredo™, Ventura™).

NOTE 2: \*\* For all Level 5 Colors, a minimum order of 5 units is required and lead times may be longer.

NOTE 3: Orders of 20 or more units may require an extended lead time. Please call our customer service team for a confirmed delivery date.

NOTE 4: When installing Lavanto® lavatory sinks into tops with the same color, TFI recommends chamfering (beveling) the edge between deck and sink to minimize the color variations which can occur in DuPont Corian®. For this reason, TFI cannot guarantee an exact color match between Lavanto® sinks and tops. A 45 degree chamfer bit is available from TFI (P.N.# C7516310), see price list for details. The C75850 Manhattan™ sink uses a special chamfer bit (P.N.# C750195), see price list for details.
